

JOHN FENTON

John Fenton studied civil engineering and hydraulic engineering at Melbourne University, and then did a PhD in applied mathematics at Cambridge University. He worked in London and Melbourne on research and investigation, then for ten years he taught mathematics at the University of New South Wales. For the rest of his career he taught and researched into coastal, ocean, and hydraulic engineering at universities in Australia and New Zealand. After retirement he has spent periods as a guest professor at the University of Karlsruhe and then the Vienna University of Technology.
