

ANA MARIA FERREIRA DA SILVA

Ana Maria Ferreira da Silva is a Professor in the Department of Civil Engineering of Queen's University, Kingston, Canada, where she carries out research in the area of fluvial hydraulics, with a special focus on large-scale river morphology and morphodynamics. She has authored or co-authored over 150 scientific publications, including the 2001 IAHR Monograph *Fluvial Processes*, whose 2nd edition will be published in August 2017. She is a recipient of the IAHR Arthur Thomas Ippen Award (2005) and the CSCE Camille A. Dagenais Award (2013). She previously was Chair of the IAHR Fluvial Hydraulics Committee (2009-2011) and the IAHR Education and Professional Development Committee (2013-2015), and co-opted member of the IAHR Council (2007-2009). She served as Associate Editor of the ASCE *Journal of Hydraulic Engineering* (2003-2015) and the *Canadian Journal of Civil Engineering* (2005-2011). She presently serves as Editorial Board Member of the *Journal of Environmental Fluid Mechanics* and Associate Editor of the *Canadian Journal of Civil Engineering*, and holds a Honorary Advisory Professorship at Hohai University, China.
